

OEM
ORIGINAL ENGINE MANAGEMENT

Ultimate

Engineered for Performance

Ultra Premium Distributors Caps and Rotors

Distributor Caps

- Manufactured from only the finest thermoplastic mold materials to provide the ultimate in dielectric strength while resisting carbon tracking.
- Feature top-quality brass or copper inserts to provide maximum corrosion resistance and superior conductivity.

Distributor Rotors

- Manufactured from reinforced thermoplastics to provide dielectric strength and long service life.
- Feature RFI coating on vane tips where specified as original equipment to minimize radio interference while providing protection against voltage spikes which could damage the ECM.
